GitHub: github.com/tmuzikova

After graduating in pharmaceutical manufacturing and working as a brand manager, I discovered a previously hidden passion for frontend and web applications. So for the last year I have been working intensively on courses and projects using HTML, CSS, JavaScript and later React in combination with TypeScript and CSS frameworks like Bootstrap or Tailwind. On the frontend, I find it fulfilling to combine the necessary technical and logical thinking with visual design and user-friendly interfaces.

SELECTED PROJECTS

PhysioReact
React, TypeScript, Bootstrap
Live: helberan.github.io/team-project/ Repo: https://github.com/helberan/team-project
A team project for a fictional physiotherapy clinic with the possibility of booking an appointment, designed to practice teamwork in Git, review TypeScript and improve working with Bootstrap in a React environment. We are currently still working on the project and making improvements.

Personal Website
React, Tailwind, ThreeJS, FramerMotion
Live: terezamuzikova.com Repo: github.com/tmuzikova/personal-web
Personal website - portfolio created with React. Thanks to this project I learned to use Tailwind and tried Framer Motion for the first time. I also practiced implementing 3D elements using ThreeJS and localizing content into multiple languages.

Sip n' Play
React, Bootstrap, ThreeJS
Live: sipnplay-codedex.netlify.app/ Repo: github.com/tmuzikova/codedex-hackathon-24
A simple website for a board game cafe created as part of a 24h solo hackathon. The goal was to create a responsive site with 3D elements in the menu and a calendar with upcoming events. It was the first time I tried programming under time pressure and also using ThreeJS.

TECHNOLOGY, TOOLS
- HTML5, CSS3
- JavaScript, TypeScript
- React
- Bootstrap, Tailwind
- Git, GitHub

LANGUAGES
- czech (native)
- english (C1)
- french (A2)

EDUCATION

JavaScript 2 (Czechitas, 36h) **React and TypeScript academy** (ReactGirls, 25h and 13h)	**Apr 2024 - Jul 2024**
